

Avifauna Namib - Zambezi 2023

2023-11-05 ~ 2023-11-22

Report by **Albert Voigts von Schütz**

All the diverse habitats encountered on this 17-day safari showcase a variety of birds, small animals, well-known African mammals, and impressive flora! This journey can be described as both ornithological and photographic because the focused birdwatching, patient observation at places of animal concentrations, and shared interest in nature often create excellent photographic opportunities!

A journey through all of Namibia's biotopes!

- The acacia savannah of the central Khomas Highlands
- Dunes and expansive lichen fields on the gravel plains of the Namib Desert
- The Atlantic Ocean, sandy beaches, and the tidal area of the Walvis Bay Lagoon, a World Heritage Site
- The granite domes and volcanic structures of the semi-desert at Spitzkoppe and Erongo, a paradise for endemic species
- Etosha National Park with mopane savannah, watering holes, tamboti forests, and saltbush steppes
- Jackalberry and Manketti forests, papyrus-lined tidal areas, lagoons, and tidal areas of the Okavango, Zambezi, and Chobe, showcasing a diversity of different animals and plants rarely found in any other African country
- Victoria Falls, a small rainforest full of surprises!
